Standard Monthly vs True Biweekly Payment Calculator

http://mortgage-x.com/calculators/biweekly_calculator.asp

This calculator will show you how much you will save if you make 1/2 of your mortgage payment every two weeks instead of making a full mortgage payment once a month.

True Biweekly vs Standard Biweekly Payment Calculator

http://mortgage-x.com/calculators/standard_biweekly.asp

This calculator will show you how much you will save if you calculate interest for two-week intervals and apply the biweekly payments less the interest to reduce principal every two weeks (in other words, if you set up a true biweekly (sometimes called simple interest biweekly) payment schedule), instead of having your money withdrawn from your bank account every two weeks by your lender and making a full mortgage payment once a month plus one additional payment once a year out of a special account, managed by the lender (pseudo biweekly or standard biweekly payments).

Extra Mortgage Payment Calculator

http://mortgage-x.com/calculators/extra_payment_calculator.asp

Find out how your monthly, yearly, or one-time pre-payments influence the loan term and the interest paid over the life of the loan.
